Form PCT/ISA/210 (first sheet) (July 1998)

emational application No.

PCT/JP 03/13332

## Box III TEXT OF THE ABSTRACT (Continuation of item 5 of the first sheet)

An exhaust gas turbocharger with a fail-safe variable-nozzle mechanism. Even if wear of the drive ring supporting part increases, the drive ring can be supported on the nozzle mount on a second supporting part. This second supporting part enables the drive ring to be always supported rightly on the nozzle mount, and to prevent the occurrence of eccentric rotation or dropping out of the drive ring due to excessive wear of the drive ring supporting part. It also prevents the occurrence of reduction in engine performance due to malfunctions of the variable-nozzle mechanism and the occurrence of breakage of the variable-nozzle mechanism as has been experienced in the prior art. In another embodiment, the variable-nozzle mechanism assembly is constructed as a cartridge which can be easily incorporated in or removed from the turbocharger.

emational application No. PCT/JP 03/13332

Box I	Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)
	· · · · · · · · · · · · · · · · · · ·
This Inte	ernational Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:
1.	Claims Nos.:
	because they relate to subject matter not required to be searched by this Authority, namely:
1	
_	
2.	Claims Nos.:
	because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
l	g as who made the control out, specifically:
İ	
	Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).
	, and a sentences of Rule 6.4(a).
Box II	Observations where units of investigation is a second of the second of t
	Observations where unity of invention is lacking (Continuation of item 2 of first sheet)
This Inter	national Searching Authority found multiple inventions in this international application, as follows:
	see additional sheet
	de addreronar sneet
. []	
1. X 8	As all required additional search fees were timely paid by the applicant, this International Search Report covers all
2. \ \ \ A	As all socrabable alsima and the
و لــا ء	As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. A	sonly some of the required additional search fees were timely paid by the applicant, this International Search Report
c	overs only those claims for which fees were paid, specifically claims Nos.:
. 🗀	
4. [] N	to required additional search fees were timely paid by the applicant. Consequently, this International Search Report is estricted to the invention first mentioned in the claims; it is covered by claims Nos.:
	to be an entire menuoned in the claims, it is covered by claims Nos.:
Remode	2 Protect
Remark or	The additional search fees were accompanied by the applicant's protest.
	χ No protest accompanied the payment of additional search fees.
	A Control of Control o

## FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

#### 1. Claim : 1

A variable nozzle mechanism in an exhaust gas turbocharger in which a second supporting part is provided on the nozzle mount for supporting a drive ring for rotation when the wear/abrasion of a supporting part reaches a predetermined amount.

#### 2. Claims: 2-12

A variable nozzle mechanism in an exhaust gas turbocharger which is constructed like a kind of cartridge.
